

Nyima Tamang

Greenbrae, CA | Junior at UC San Diego, Math–Computer Science Major (Fall Transfer)

■ 12tamang12@gmail.com | ■ github.com/nima64 | ■ linkedin.com/in/nima64

Education

University of California, San Diego — B.S. Mathematics–Computer Science (Junior, Fall Transfer)

Relevant Coursework: Compiler Construction, Graph Theory, Proof Writing, Algorithms, Systems Programming,

Physics Series (Mechanics & Electromagnetism), Linear Algebra, Calculus III, Differential Equations

Technical Skills

- Languages: Python, JavaScript/TypeScript, C/C++, SQL, Lua
- Frameworks & Tools: React, Next.js, Node.js, Firebase, Supabase, Electron
- Databases: PostgreSQL, Firestore (NoSQL), Firebase Realtime Database
- Other: Git/GitHub, REST APIs, FFmpeg, Docker, Linux

Experience

Google Summer of Code 2024 — VLC Media Player (Remote)

Open-Source Contributor

- Improved caching and concurrency in VLC's Lua and C modules to reduce startup latency.
- Designed APIs enabling dynamic integration of video/image filters and playback tools.
- Collaborated with core VLC maintainers via Git, code reviews, and debugging sessions.

Freelance Software Engineer (Upwork) (2024–Present)

- Built a custom ERP-style quoting and RFQ system (Next.js, Firebase, TanStack Table) for Dayton Financial, streamlining operations and client workflows.
- Developed Vimerse Studio, an AI-powered video-editing Electron app (~20k LOC) with multi-developer collaboration. Implemented features such as image-to-video generation, audio voiceover syncing, and performance optimizations.
- Managed shifting codebases in fast-moving startup-style teams; coordinated merges, resolved Git conflicts, and optimized CI pipelines.

Projects

- Minecraft Launcher Optimization (Upwork): Forked Electron/Vue app, reducing bundle size and memory usage for smoother runtime performance.

Achievements

- MESA Excellence in Physics Award — Recognized for outstanding academic performance in Electromagnetism & Mechanics.
